## DETAILED ACTION

### *Election/Restrictions*

Examiner notes that the restriction requirement dated 10/13/2006 pertained to the original claims filed 8/20/2004. This restriction requirement pertains to the preliminary amendments dated 10/13/2006, and should replace the abovementioned restriction requirement.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 and 13-14, drawn to an intelligent ink cartridge comprising an electronics module and a memory.

Group II, claim(s) 6-12 and 15-21, drawn to an ink cartridge apparatus comprising a micro-controller and a computer program adapted to execute the steps of transferring an ink utilization percentage from an EEPROM to a micro-controller; transferring the ink utilization percentage from the micro-controller to the ink jet apparatus; and updating the ink utilization percentage; storing the updated ink utilization percentage into the micro-controller.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in both groups is an ink cartridge comprising a micro-controller and non-volatile memory. This element cannot be the special technical feature under PCT Rule 13.2 because the element is shown in the prior art. US Patent 6473571 B1 to Wegmen et al. teach of a container
